ABSTRACT

This report provides summary enrollment information by level of study, attendance, status (full and part time), sex, field of specialization, State, institution, and institutional level and control. A detailed listing showing enrollment within each field of study at each institution is included in a companion report, "Students Enrolled for Advanced Degrees, Fall 1968: Institutional Data." Of the 819 institutions included in this study, 234 had enrollments for first-professional degrees as well as for master's or doctor's degrees, 526 had enrollments for master's or doctor's degrees only, and 59 had enrollments for first-professional degrees only. Thus, summary figures for master's or doctor's degree candidates are based on 760 institutions, while those for first-professional degree candidates are based on a total of 293 institutions. The bulk of the report consists of detailed tables and figures. (Author/NF)

HIGHLIGHTS

Students enrolled for master's and doctor's degrees

1. Fall 1968 enrollment for master's and doctor's degrees totaled 703,745, a rise of about 8 percent over 1967.

2. The increase from 1967 to 1968 was greater for women (up about 14 percent) than for men (up about 5 percent). The number of men studying full time increased only about 3 percent as compared with about 8 percent for men studying part time, 21 percent for women studying full time, and 11 percent for women studying part time.

3. In both 1967 and 1968, about 46 percent of the candidates were enrolled for full-time study. In both years, the percent taking full-time work was lower among the first-year students than among intermediate or terminal-year students.

4. Women accounted for about one-third of the candidate group in both years (33 percent in 1968 and 32 percent in 1967).

5. About 65 percent of the candidates were enrolled in publicly controlled institutions in 1968 as compared with about 63 percent in 1967.

Students enrolled for first-professional degrees

1. A total of 137,877 students were enrolled in programs leading to first-professional degrees in the fields covered by this survey; the 1968 figure was about the same as the estimated total for 1967.

2. A great majority of the first-professional candidates were enrolled for full-time study (92 percent in 1968 and 93 percent in 1967).

3. In both 1967 and 1968, only about one-twentieth of the first-professional candidates were women (6 percent in 1968 and 5 percent in 1967).

FOREWORD

This publication marks the 10th in the Office of Education's series of surveys of enrollment for advanced degrees. The survey series was initiated in 1959 to provide information needed by the National Science Foundation, the National Institutes of Health, and the U.S. Office of Education for planning fellowship, training, research, and facilities programs. Other organizations concerned with graduate education and those responsible for the administration of our colleges and universities have also found helpful information in this survey series.

The reader concerned with historical enrollment trends should also refer to the Office of Education's series on degrees granted. The most recent report in that series is Earned Degrees Conferred, 1967-68. Together, the two survey series provide a fairly comprehensive picture of the flow of students through advanced studies.

The Office of Education is grateful for the cooperation of the institutions of higher education that supplied the data for this report.

Theodore H. Drews, Chief
Higher Education Surveys Branch

APPENDIX B TABLES

B-1 Trend in full-time enrollment for advanced degrees in selected fields: Total 1965-68; total men and first-year men, 1966-68 84

B-2 Comparison of advance estimates of full-time enrollment for advanced degrees with actual totals, for selected fields: Fall 1968 85

B-3 Comparison of year-to-year shifts in full-time enrollment for advanced degrees, based on advance estimates and on actual totals: Fall 1967 and fall 1968 86

INTRODUCTION

Enrollment for master's and doctor's degrees was 703,745 in fall 1968, up about 8 percent from the fall 1967 total of 649,697. The increase was substantially greater for women (about 14 percent) than for men (about 5 percent). The number of women enrolled for full-time study increased by 21 percent, as compared with 11 percent for part-time women, 8 percent for part-time men, and 3 percent for full-time men. Figure 1 shows these trends; figure 2 shows similar information based on first-year students only. A later section of this report, "Comparison of 1968 and 1967 enrollments" on pages 5 to 11, considers the year-to-year shifts in more detail, both for master's and doctor's candidates and for first-professional candidates.

The Office of Education's annual survey of students enrolled for advanced degrees was initiated in 1959. The first survey was limited to the fields of science, mathematics, and the health professions. In its second year, the survey was broadened to cover all of the principal fields in which master's and doctor's degrees were awarded. In 1966, the questionnaire became part of the first Higher Education General Information Survey (HEGIS) and was extended in two major directions. The first change involved the inclusion of students in programs leading to first-professional degrees in selected fields as well as those working toward master's and doctor's degrees; the second change called for separate counts of men and women instead of the combined totals which had been obtained in previous years. The 1966 questionnaire was reused without change in 1967. In 1968, the questionnaire requested counts for 11 additional fields that had previously been reported in "other" or "miscellaneous" categories. Five fields were added in the business and commerce area (finance and banking, hotel or restaurant administration, marketing, real estate and insurance, and transportation). There were single additions within the areas of agriculture (fish, game, or wildlife management), education (education specialist), engineering (nuclear engineering), foreign languages (general major in three or more modern languages), physical sciences (general earth sciences), and psychology (general psychology).

This report provides summary enrollment information by level of study, attendance status, sex of student, field of specialization, State, institution, and institutional level and control. A detailed listing showing enrollment within each field of study at each institution is included in a companion report, Students Enrolled for Advanced Degrees, Fall 1968: Institutional Data.

INSTITUTIONS INCLUDED

The advanced enrollment questionnaire, together with the other questionnaires that make up the HEGIS package, was sent to all 2,495 institutions of higher education in the 1968-69 higher education survey population.[1]

A total of 807 institutions provided data on fall 1968 enrollments. In addition, it was known that 12 of the nonresponding institutions had advanced enrollments even though they did not submit a survey questionnaire. In the analysis of 1968 enrollment

FIGURE 1.–ENROLLMENT FOR MASTER'S AND DOCTOR'S DEGREES, ALL LEVELS OF ENROLLMENT COMBINED, BY SEX OF STUDENT AND ATTENDANCE STATUS: AGGREGATE UNITED STATES, FALL 1967 AND FALL 1968

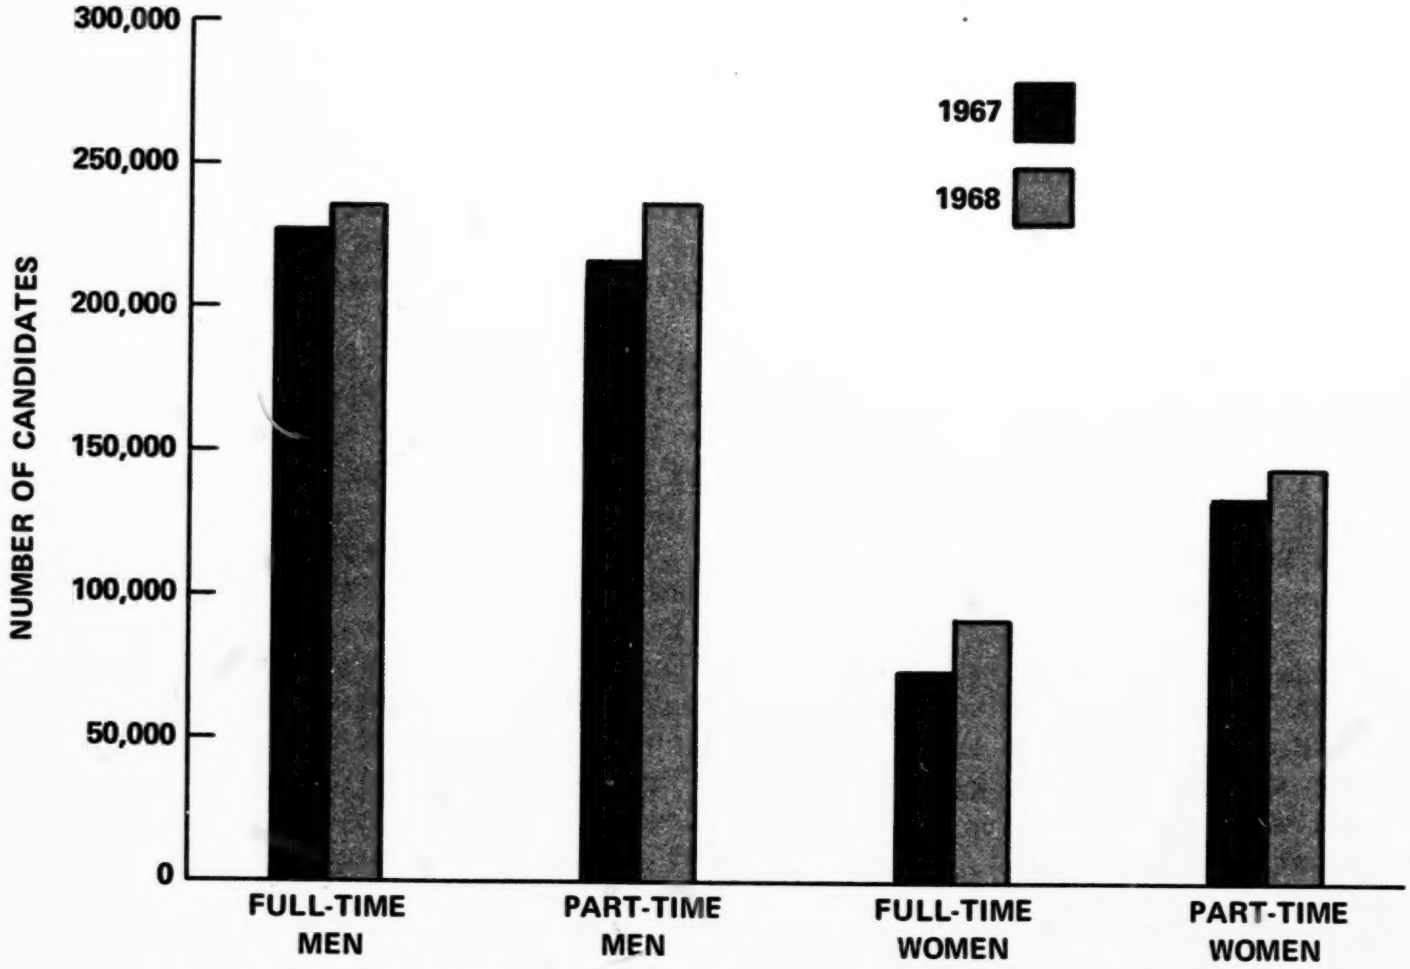

FIGURE 2.– ENROLLMENT FOR MASTER'S AND DOCTOR'S DEGREES, FIRST-YEAR STUDENTS ONLY, BY SEX OF STUDENT AND ATTENDANCE STATUS: AGGREGATE UNITED STATES, FALL 1967 AND FALL 1968

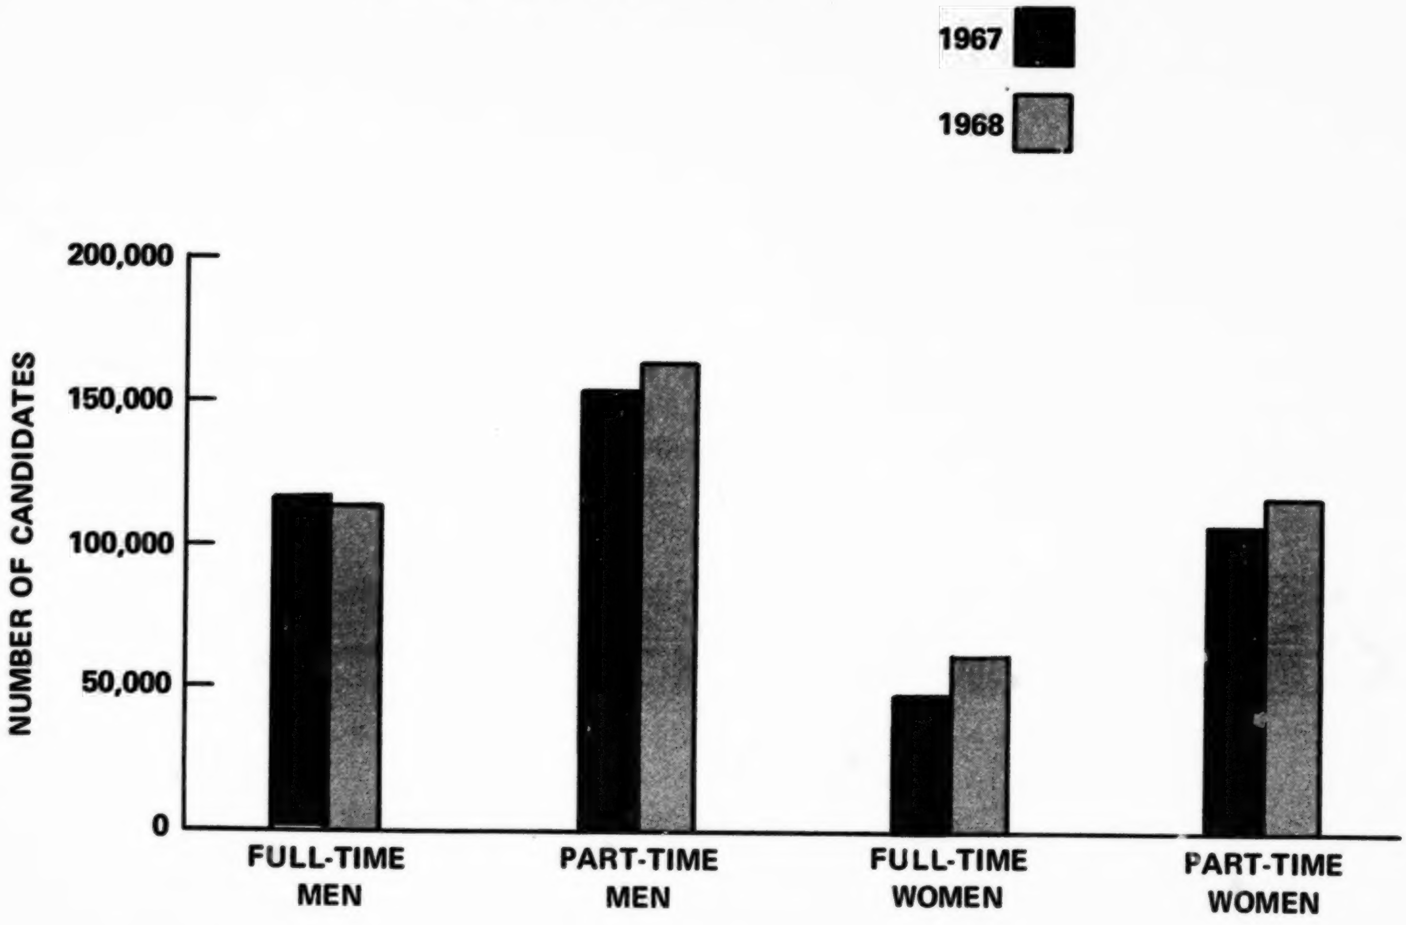


data, information provided by these 12 institutions in earlier surveys was utilized for current data. Accordingly, the tables of the present report are based on a total of 819 institutions. The institutions for which the older data were used and the numbers of candidates involved are:

Institution	Most recent report	Number of candidates: Master's and doctor's	Number of candidates: First professional
Total	--	7,787	1,683
Berkeley Baptist Divinity School (California)	1967	7	37
California State College at Hayward	1967	451	--
San Francisco State College (California)	1967	2,963	--
Yale University (Connecticut)	1966	2,335	860
John Marshall Law School (Illinois)	1966	287	755
Bexley Hall (New York)	1967	--	31
Niagara University - Seminary of Our Lady of Angels (New York)	1967	19	--
Vassar College (New York)	1967	8	--
Oberlin College (Ohio)	1967	63	--
Wright State University (Ohio)	1967	543	--
University of Rhode Island	1967	991	--
Tennessee Agricultural and Industrial State University	1967	120	--

Since these 12 institutions account for only about 1 percent of master's and doctor's candidates and also about 1 percent of first-professional candidates, it seems safe to say that utilization of the noncurrent data does not seriously distort the figures in this report. So far as the Office of Education could determine, the other 1,676 institutions in the fall 1968 higher education universe had no candidates for advanced degrees.

Of the 819 institutions included in this report, 234 had enrollments for first-professional degrees as well as for master's or doctor's degrees, 526 had enrollments for master's or doctor's degrees only, and 59 had enrollments for first-professional degrees only. Thus, summary figures for master's or doctor's degree candidates are based on 760 institutions, while those for first-professional degree candidates are based on a total of 293 institutions.

STUDENTS INCLUDED

Instructions for inclusion or exclusion of students were exactly the same for the 1968 survey as for the previous year. All students enrolled for a master's degree, for a doctorate, or for a first-professional degree in specified fields were to be included. The survey instructions also described several categories of students that were to be excluded: Students not enrolled during the fall term (even if they were known to be studying toward an advanced degree), students in programs not terminating in an advanced degree, and postdoctoral students. Section B of the instructions to survey respondents (appendix A) provides a more detailed account of students to be included or excluded.

STUDENT CLASSIFICATIONS

Colleges were asked to classify students into three levels of study: First-year, intermediate years, and terminal-year--the same levels used in the previous survey. First-year students are defined as those who had completed less than one full year of required study for an advanced degree. Students expected to complete all doctoral requirements, or all requirements for the first-professional degree by June 30, 1969, are defined as terminal. Intermediate students are those falling between the two extremes. Levels of study are specified in sections F and I of the survey instructions (appendix A).

Classification of enrollment by attendance status is specified in section G of the survey instructions. A full-time student is defined as one whose academic load--course work or other required activity--is at least 75 percent of the normal student load as defined by the institution; students carrying less than 75 percent of the normal load are classified as part-time.

ORGANIZATION OF THE TABLES

To facilitate comparisons, tables 1 through 8 are identical in format with the corresponding tables in the 1967 report. In each of these tables, separate counts are given by sex of student, level of study (first-year, intermediate years, and terminal-year) and attendance status (full-time or part-time). Other classifications vary from table to table.

Table 1 provides an overall summary of enrollment in programs leading to master's and doctor's degrees by institutional level and control. For this table, 4-year institutions were classified into two groups, universities and others. The university classification includes those institutions which give considerable stress to graduate instruction, which confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and which have at least two professional schools that are not exclusively technological. Institutions that do not meet these criteria make up the "other 4-year" group. Table 2 presents similar information for students in programs leading to first-professional degrees.

Tables 3 and 4 provide counts of advanced enrollment by State; tables 5 and 6, by broad area of study and by specific field of study, respectively. For each institution in the survey, table 7 shows total enrollment for master's and doctor's degrees, and table 8 shows total enrollment for first-professional degrees in selected fields.

Tables 9 through 12, which compare 1968 with 1967 enrollments, have no counterparts in the 1967 report. These tables are considered in more detail in the section that follows.

Totals have not been rounded in the tables of this report. This presentation in no way implies that totals and subtotals are accurate to the last digit. It was believed, however, that the tables could be used more conveniently if the many totals and subtotals were reported without rounding.

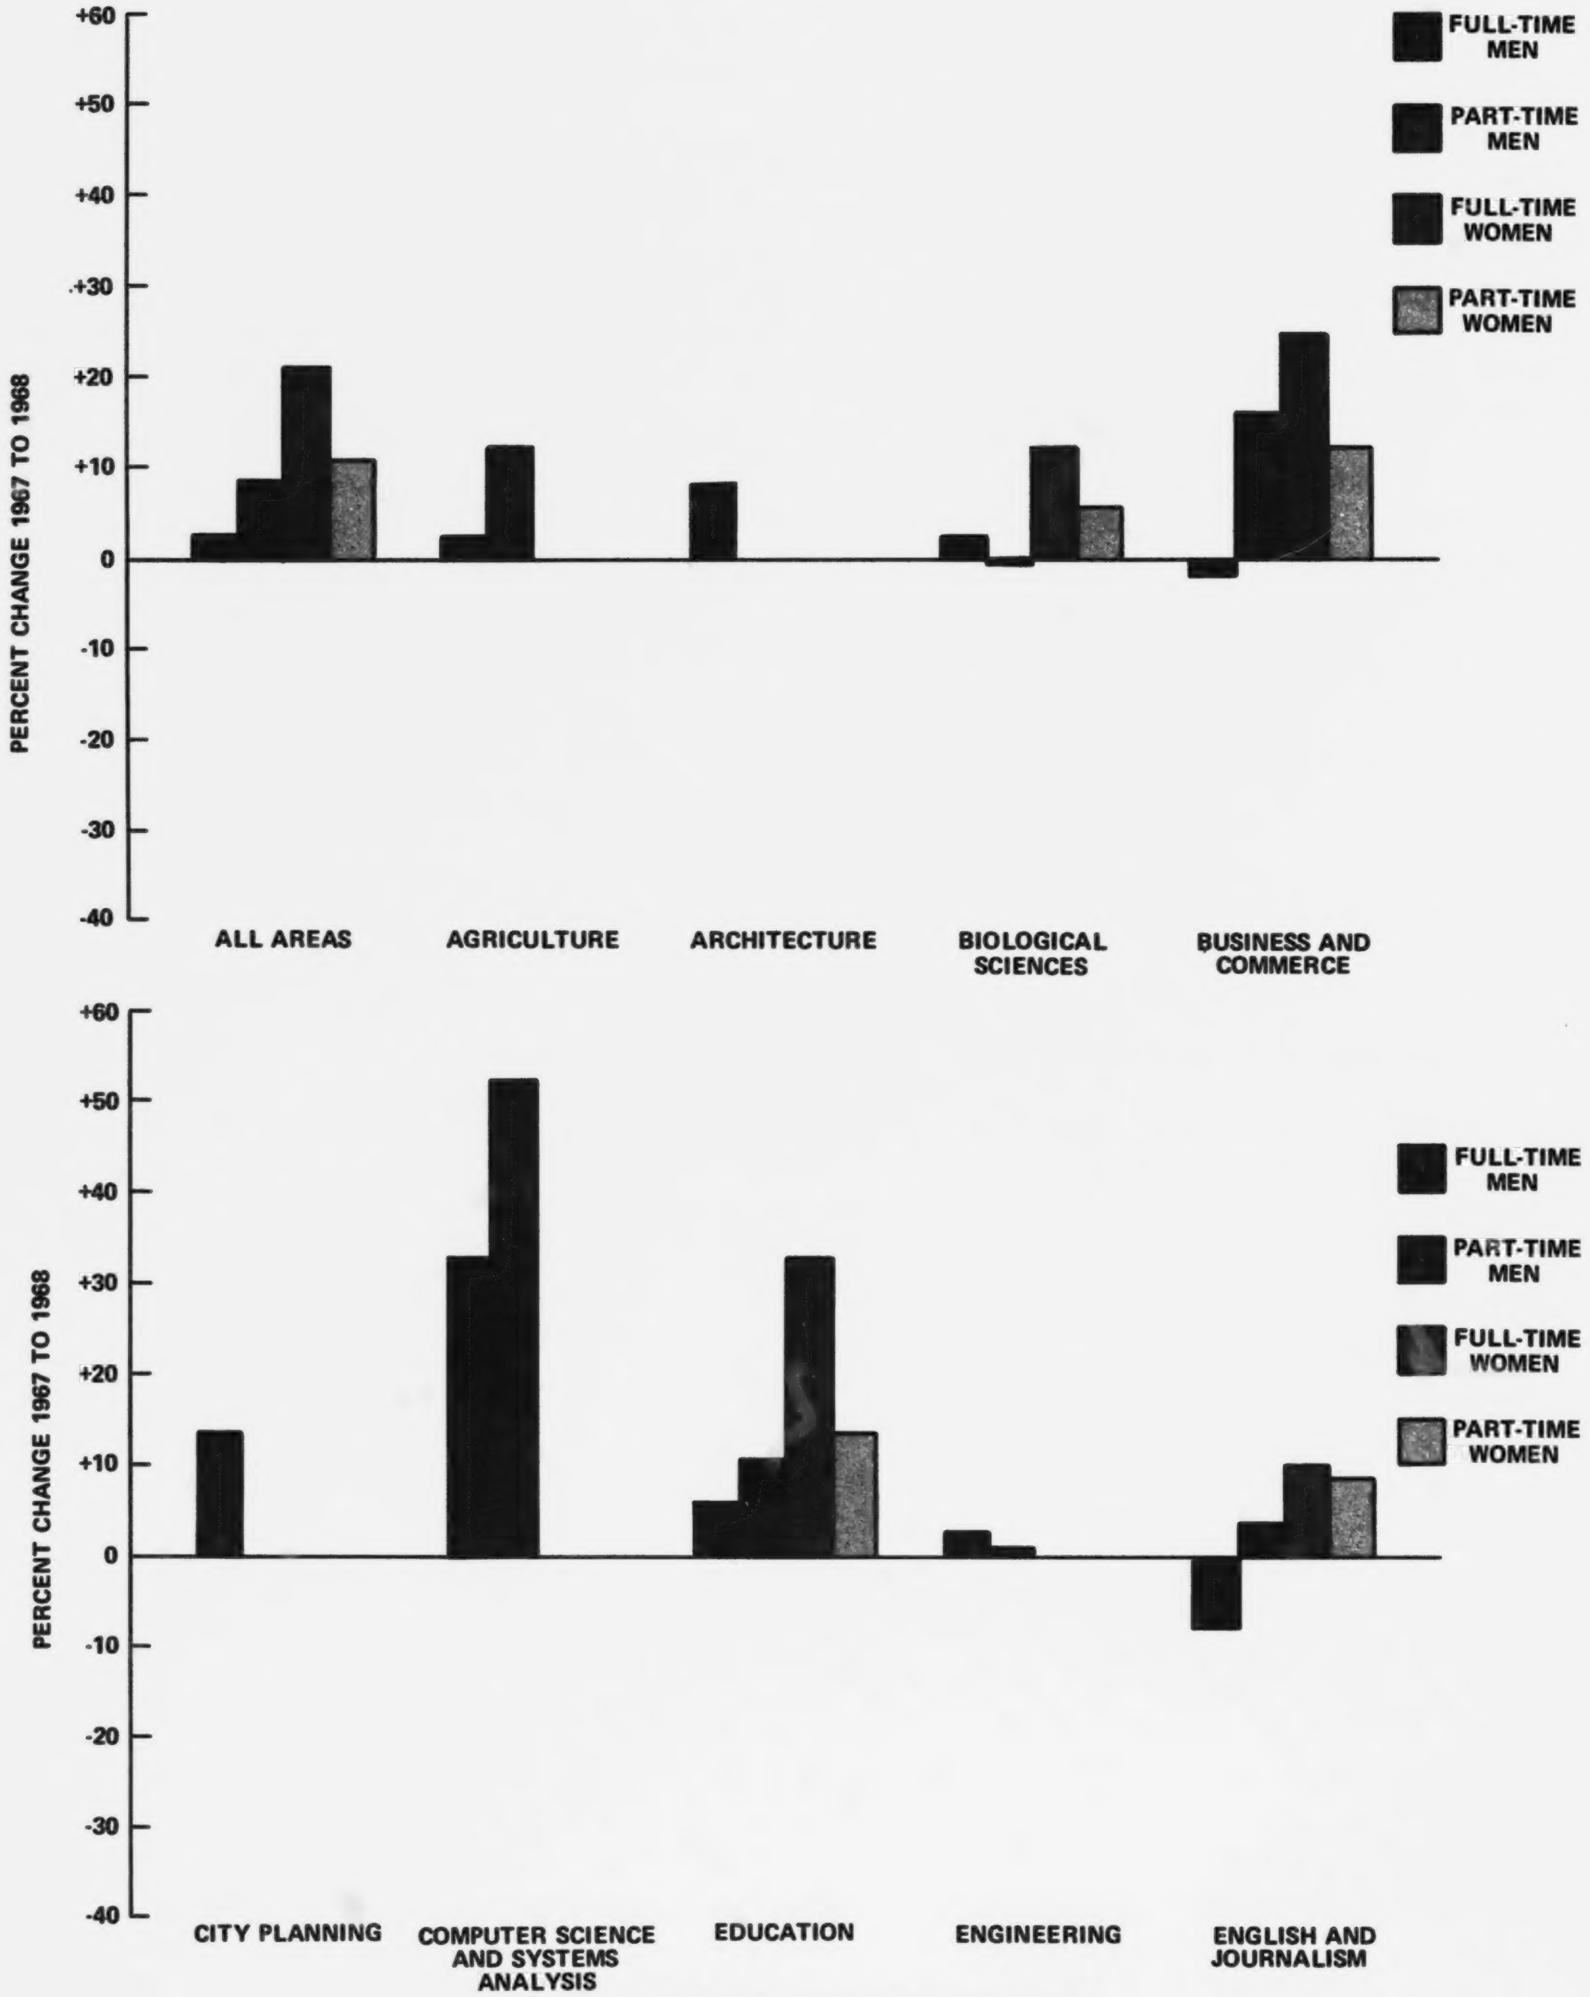
COMPARISONS OF 1968 AND 1967 ENROLLMENTS

Table 9 summarizes enrollment for master's and doctor's degrees for the three levels of study combined (first-year, intermediate year, and terminal-year), by sex of student, attendance status, and area of study; figure 3 shows the year-to-year changes graphically for each area of study.

As table 9 shows, enrollment for master's and doctor's degrees rose about 8 percent. The increases were by no means uniform for different subgroups of candidates, as shown by the following comparisons:

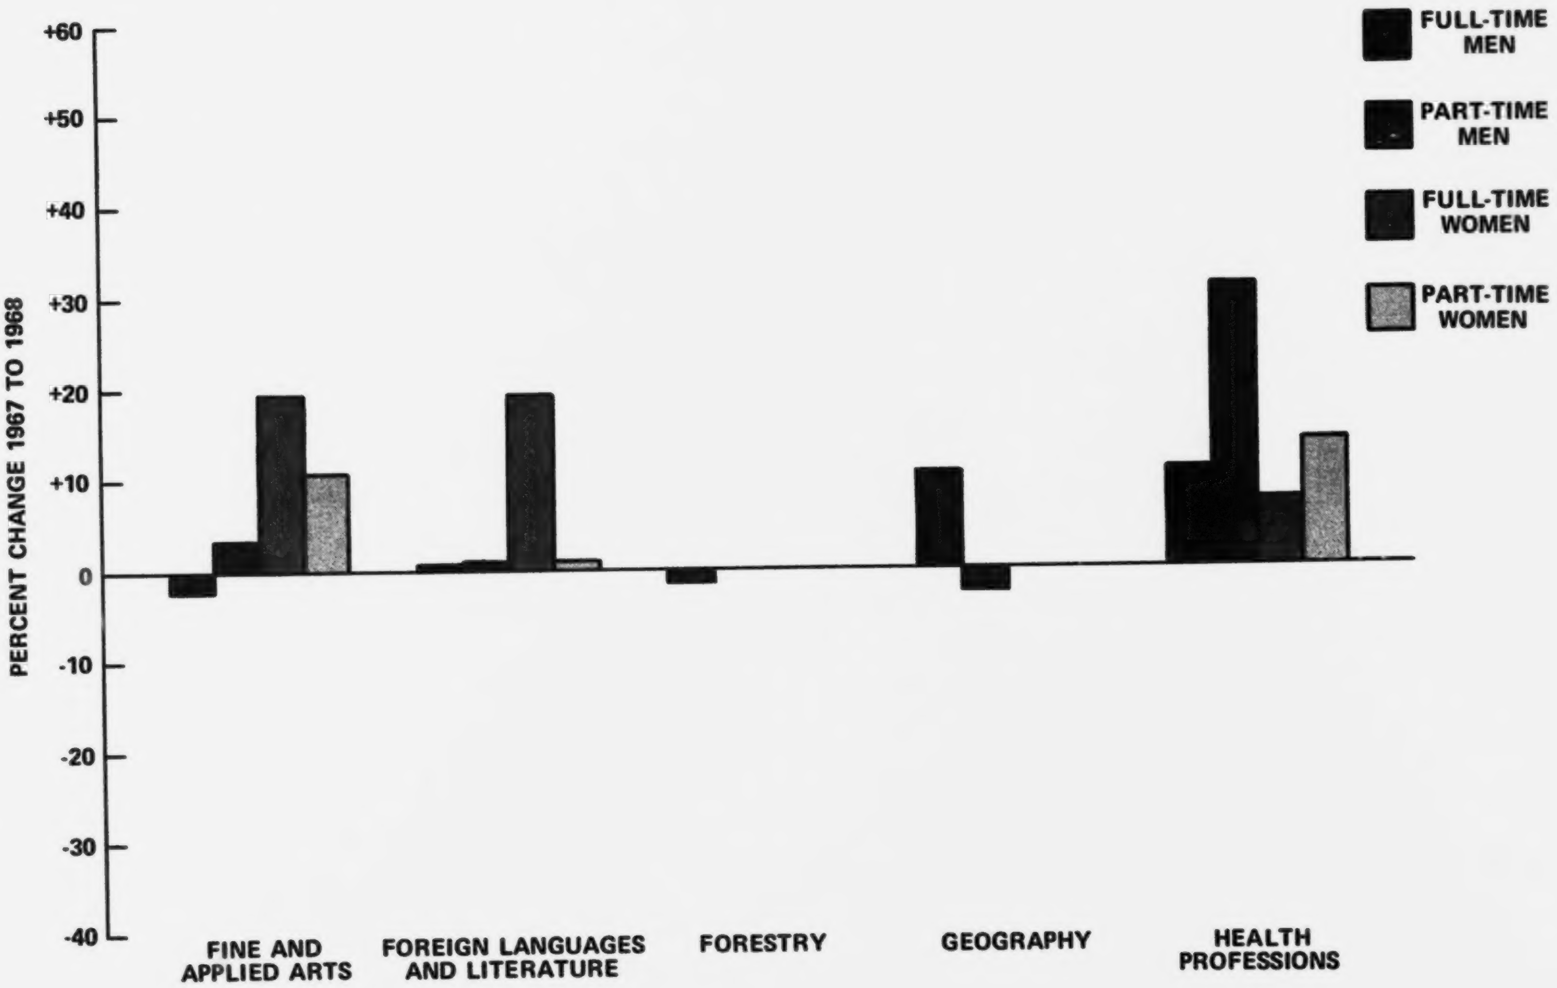
	Master's and doctor's		
All levels of enrollment:	1967	1968	Percent change
Grand totals	649,697	703,745	+ 8.3
All men	444,372	468,779	+ 5.5
All women	205,325	234,966	+14.4
All full-time	301,140	322,936	+ 7.2
All part-time	348,557	380,809	+ 9.3
Full-time men	226,583	232,573	+ 2.6
Part-time men	217,789	236,206	+ 8.5
Full-time women	74,557	90,363	+21.2
Part-time women	130,768	144,603	+10.6

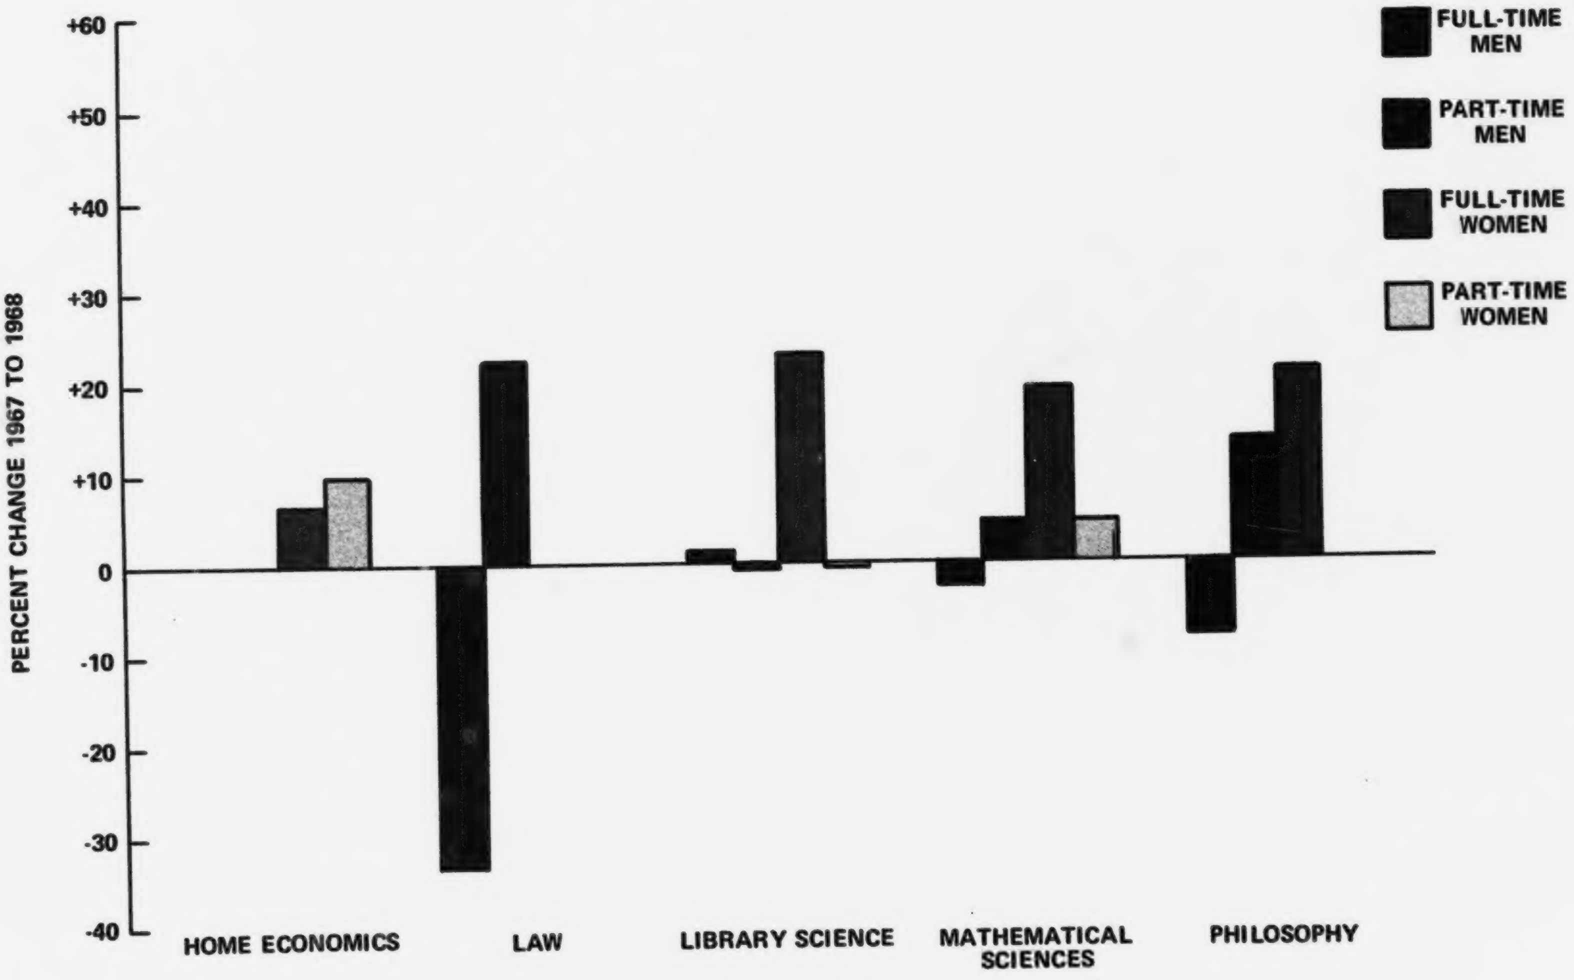
FIGURE 3.- PERCENT CHANGE IN ENROLLMENT FOR MASTER'S AND DOCTOR'S DEGREES, 1967 TO 1968, ALL LEVELS OF ENROLLMENT COMBINED, BY SEX OF STUDENT, ATTENDANCE STATUS, AND AREA OF STUDY: AGGREGATE UNITED STATES



Note. – Percent change not shown for enrollments under 500.

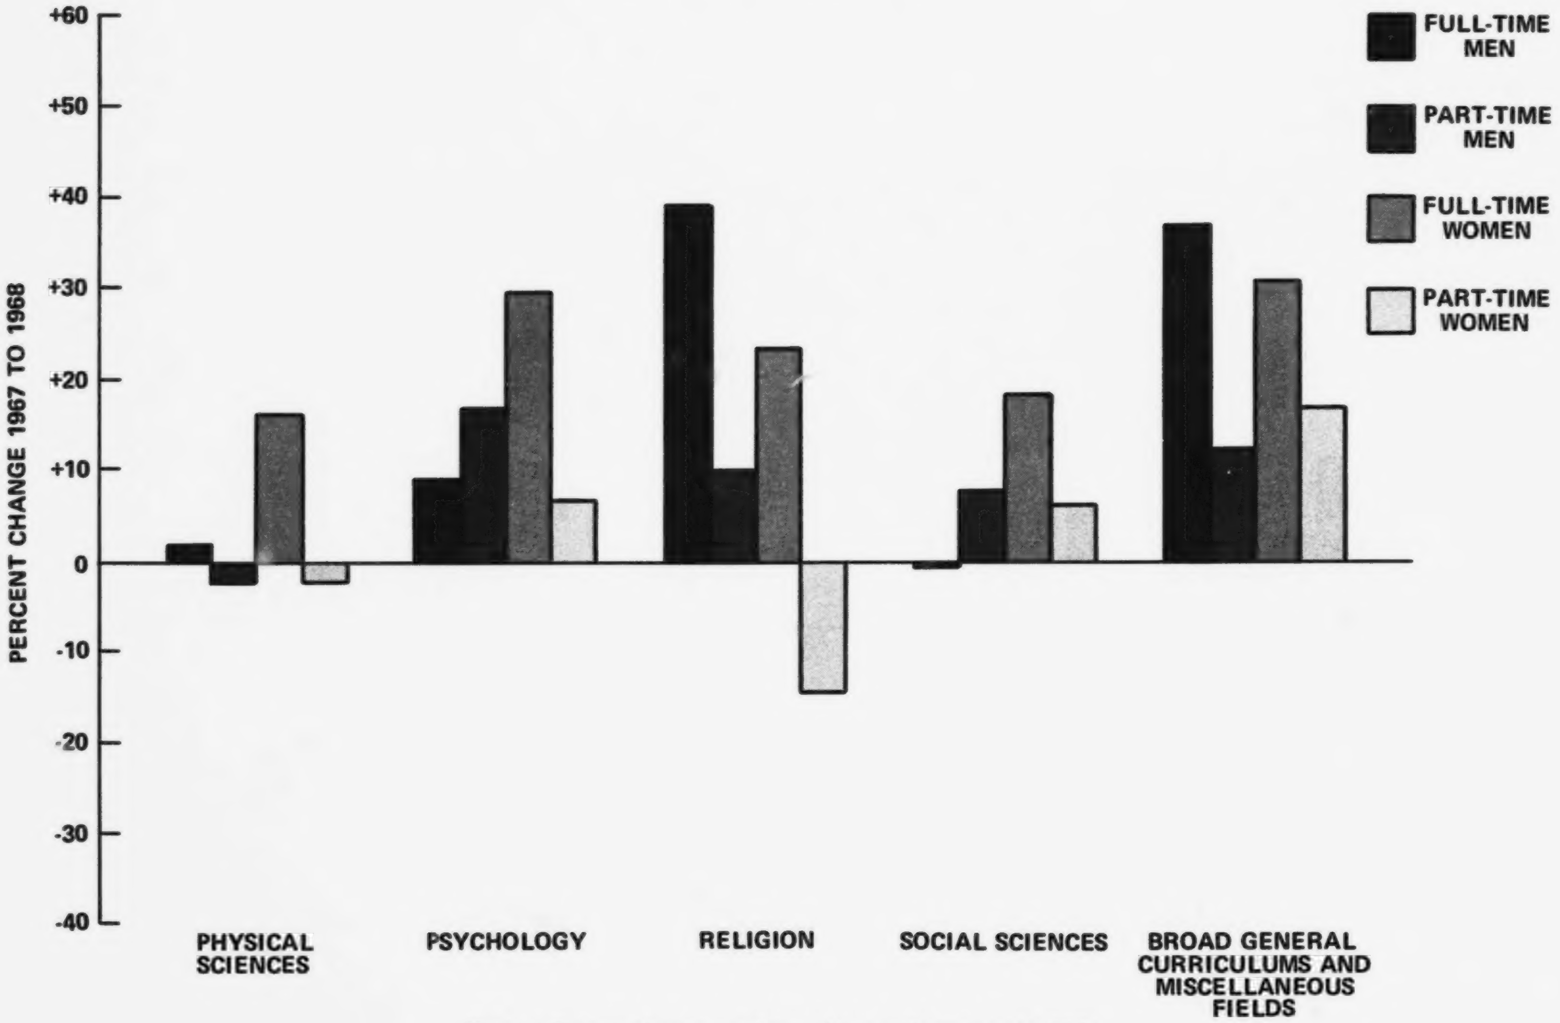
FIGURE 3.- CONTINUED





Note. – Percent change not shown for enrollments under 500.

FIGURE 3.- CONTINUED



Note. — Percent change not shown for enrollments under 500.

The patterns of change are similar for students in their first year of graduate study (table 10). However, percentage increases tend to be smaller for the first-year group than for all levels combined. Women enrolled for full-time study were an exception: the percentage increase was greater for first-year candidates than for those at all levels (24 percent versus 21 percent). Enrollments of first-year candidates may be summarized as follows:

First-year students only:	Master's and doctor's 1967	1968	Percent change
Grand totals	428,026	458,334	+ 7.1
All men	270,200	278,857	+ 3.2
All women	157,826	179,477	+13.7
All full-time	165,782	174,615	+ 5.3
All part-time	262,244	283,719	+ 8.2
Full-time men	116,920	113,976	- 2.5
Part-time men	153,280	164,881	+ 7.6
Full-time women	48,862	60,639	+24.1
Part-time women	108,964	118,838	+ 9.1

Year-to-year shifts in first-professional enrollments are shown in table 11 (all levels of study) and table 12 (first year of study). These tables are based on only those institutions that reported professional school enrollments in both the 1967 and 1968 surveys; hence, enrollments do not agree with those in other tables of this report. Adjustment of first-professional counts was considered essential for year-to-year comparisons because of known under-reporting in the 1967 survey. In particular, after the publication of the 1967 survey outcomes had gone to press, it was found that a number of institutions had omitted information on some or all of their first-professional candidates (part B of the survey questionnaire) even though they had provided complete reports on their master's and doctor's candidates (part A of the survey questionnaire). After the problem had been identified, special efforts were made to ensure complete coverage of professional enrollments in 1968. Accordingly, direct comparisons of 1967 with 1968 enrollments would be misleading: tables 11 and 12 have therefore been limited to those institutions reporting on their professional schools in both years.

Changes in total first-professional enrollments (table 11 and figure 4) were negligible, with an estimated rise of less than 1 percent. Year-to-year shifts for the major subgroups were:

	First-Professional		
All levels of enrollment:	1967	1968	Percent change
Grand totals	117,106	117,380	+ .2
All men	110,720	110,448	- .2
All women	6,386	6,932	+ 8.5
All full-time	108,848	108,284	- .5
All part-time	8,258	9,096	+10.1
Full-time men	103,031	101,943	- 1.1
Part-time men	7,689	8,505	+10.6
Full-time women	5,817	6,341	+ 9.0
Part-time women	569	591	+ 3.9

Enrollment of first-year students in professional fields declined an estimated 3 percent (table 12). Totals by attendance status and sex of student were:

	First-professional		
First-year students only:	1967	1968	Percent change
Grand totals	40,784	39,469	- 3.2
All men	38,463	36,729	- 4.5
All women	2,321	2,740	+18.1
All full-time	37,653	35,965	- 4.5
All part-time	3,131	3,504	+11.9
Full-time men	35,584	33,499	- 5.9
Part-time men	2,879	3,230	+12.2
Full-time women	2,069	2,466	+19.2
Part-time women	252	274	+ 8.7

As these figures make clear, men studying full time account for the great majority of first-professional enrollments: the "grand totals" are heavily determined by this subgroup. Percentage increases for women and for men studying part time reflect rather small gains in actual numbers of students.

The year-to-year shifts reported here are consistent with the Office of Education's advance estimates, based on a sample of institutions.[2] Appendix B presents a brief summary of the advance estimates in relation to the outcomes of the complete survey.

APPROVAL EXPIRES: 6/30/70

INSTRUCTIONS FOR COMPLETING OE FORM 2300-2.5, HIGHER EDUCATION GENERAL INFORMATION SURVEY - SCHEDULE V. - STUDENTS ENROLLED FOR ADVANCED DEGREES, FALL 1968

Please read the definitions and instructions before entering the data for your institution. If you need additional clarification on any of the items, please call Dr. Marjorie Chandler, 202-962-7301 in Washington, D.C.

If your institution does not grant advanced degrees, please "X" here ☐ and enter the name and address of your institution and return this form. Enter the name and address of your institution in Item 3, Page 1.

DEFINITIONS AND INSTRUCTIONS

STUDENTS ENROLLED FOR ADVANCED DEGREES, FALL 1968

General

A. PURPOSE: The purpose of this schedule is to ascertain the number of students enrolled this term for advanced degrees, the students' fields of specialization, their progress toward their degrees, and the numbers who are expected to complete the requirements for the doctoral or selected professional degrees by June 30, 1969.

B. SCOPE OF THE SURVEY: This is not a survey of all students taking graduate study, but of all enrolled for a degree beyond the baccalaureate.

1. Students to be included in the report:
    - a. Include in Part A all students enrolled for a master's degree; for a 6-year degree such as Education Specialist *(Ed. S.)*, Civil Engineer *(C.E)*, etc.; and for the doctorate *(Ph.D., Ed. D., etc.)*
    - b. Include in Part B all students enrolled for first-professional degrees in Dentistry *(D.D.S. or D.M.D. only)*, Law *(LL.B. or J.D. only)*, Medicine *(M.D. only)*, Theology *(B.D. only)*, Veterinary Medicine *(D.V.M. only)*, Chiropody or Podiatry *(D.S.C. or Pod.D.)*, Optometry *(O.D.)*, and Osteopathy *(D.O.)*. Students in these fields enrolled for degrees beyond these specifically named here should be reported in Part A.
    - c. Include in Parts A and B students enrolled for an advanced degree on the main campus, on a branch campus, or in an extension center.
2. Students to be excluded from this report:
    - a. Students who, although known to be working on degree requirements, are not formally enrolled this term.
    - b. Students enrolled in graduate-level curriculums which lead to increased professional competence, but which do not terminate in an advanced degree. Students in certificate programs, for school principals for example, should be excluded.
    - c. "Special" and "unclassified" students taking courses at the levels requested, but not enrolled for degrees.
    - d. Post-doctoral students.
    - e. Students enrolled at a branch or extension center in a foreign country.

C. TIME PERIOD: Report only those students enrolled as of the fall term *(1968-69)* of the current academic year.

PART A--STUDENTS ENROLLED FOR MASTER'S AND HIGHER DEGREES

D. GROUPING OF SUBJECT-FIELDS: Please examine Part A of this schedule to observe how the various fields of study have been grouped. Each subject group is divided to indicate enrollment by men *(M)* and women *(W)*. All of the subject-fields have been classified under the following 26 capitalized headings:

1000	AGRICULTURE
1400	ARCHITECTURE
1700	BIOLOGICAL SCIENCE
2000	BUSINESS AND COMMERCE
1500	CITY PLANNING
2100	COMPUTER SCIENCE AND SYSTEMS ANALYSIS
2300	EDUCATION
2600	ENGINEERING
2900	ENGLISH AND JOURNALISM
3200	FINE AND APPLIED ARTS
3300	FOLKLORE
3500	FOREIGN LANGUAGES AND LITERATURE
3800	FORESTRY
4100	GEOGRAPHY
4400	HEALTH PROFESSIONS
4700	HOME ECONOMICS
5000	LAW
5300	LIBRARY SCIENCE
5600	MATHEMATICAL SUBJECTS
6500	PHILOSOPHY
6800	PHYSICAL SCIENCES
7100	PSYCHOLOGY
7300	RECORDS MANAGEMENT
7400	RELIGION
7700	SOCIAL SCIENCES
8300	BROAD GENERAL CURRICULUMS AND MISCELLANEOUS FIELDS

If your institution does not enroll students for advanced degrees in one of the 26 subject areas listed above, you may skip all of the items under that heading. Thus, most registrars will properly skip the entire section headed AGRICULTURE. Similarly, many will properly skip the sections on HEALTH PROFESSIONS and on RELIGION. Many specialized professional schools will skip the section on EDUCATION. Technological schools will generally skip the section on FINE AND APPLIED ARTS. Men's colleges will skip the section on HOME ECONOMICS. Appropriate skipping can speed the completion of your report without injury to quality or accuracy.

E. CLASSIFICATION OF ENROLLMENT BY FIELD OF STUDY: Students should be reported in the fields in which they are specializing, regardless of the department, division, or college in which they are enrolled. For example, students specializing in Agricultural Engineering should be reported in item 2606 under the broad area of Engineering even though they may be receiving their training in the school of Agriculture.

1. Please classify enrollment into fields of study as specifically as the list on the schedule permits. Example: Enrollment in an Accounting curriculum should be reported as Accounting *(Item 2002)*, NOT in Business and Commerce, General *(Item 2001)*.

2. Enrollment in fields of study which are not listed should be consolidated with the listed fields if such consolidation is descriptive of the specialization. Thus,

   Sculpture should be reported in Fine and Applied Arts, other major fields *(Item 3213)*;

   Astrophysics should be reported in Astronomy *(Item 6804)*;

   Geochemistry should be reported in Earth Science, all other *(Item 6828)*;

   Criminology should be reported in Sociology *(Item 7725)*;

   Police Administration should be reported in Applied Social Sciences, all other *(Item 7746)*;

   Industrial Design should be reported in Fine and Applied Arts, other specific major fields *(Item 3213)* or in Architecture *(Item 1400)*-- depending on the nature of the curriculum; and so on.

3. Fields of Study Offered By Your Institution For the First Time This Term: If enrollments are reported in fall 1968 for the first time, in a field of study new to your institution, please place an "X" beside the item number. This may save correspondence later regarding the entry.

4. Inter-area fields of study: Item 8313 is for reporting fields of specialization which represent two or more broad SUBJECT AREAS. For example, MASS COMMUNICATIONS, encompassing segments of PSYCHOLOGY, EDUCATION, BUSINESS, JOURNALISM, SOCIAL SCIENCES, FINE ARTS, etc., should be reported here. Specify the name of the inter-area field of study, when [illegible] in Item 8313.

5. If the field of study does not fit into any of the listed fields, report in Item 8314, Field of Study Not Classifiable in Items 1000 through 8313 above.

6. If there is no information about the field of study, report the enrollment in Item 8399, Field of Study Not Identified.

7. A cross-reference listing of related fields of study appears at the start of each subject-area on the form. Your attention to these lists will be appreciated.

8. Note that the listing of fields of study within each broad subject area has a similar structure. The first field of study in the list is the general curriculum in the subject area *(with no further specialization)*; the next-to-last field of study is for reporting fields of study within the subject area which are not listed; and the last category is for reporting enrollment where the field of study within the subject area is not known--where there is no information on the specialization within the subject area.

F. CLASSIFICATION OF ENROLLMENT BY LEVEL OF STUDY: To be consistent with the categories of fellowship support used by the National Institutes of Health and the National Science Foundation, please classify enrollment into the following categories:

1. Students who have completed less than one full year of required study for an advanced degree.--Report in columns 5-6 students who, prior to this term, had completed less than two semesters or three quarters of full-time graduate study or the equivalent in part-time study. Note that these students are identified by the amount of study completed prior to this term, rather than the number of semesters or quarters in which they have been enrolled. Work required because of lack of undergraduate background is not to be included in computing amount of study completed.

2. Students who have completed one or more years of required study but who are not expected to complete all doctoral requirements by June 30, 1969.--Report in columns 7-8 students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study for an advanced degree but who are not expected to complete all doctoral requirements by June 30, 1969.

3. Students who are expected to complete all doctoral requirements by June 30, 1969.--Report in columns 9-10 the ESTIMATED number of students who are expected to complete all DOCTORAL *(Ph.D., Ed.D., etc.)* requirements by June 30, 1969.

G. CLASSIFICATION OF ENROLLMENT BY ATTENDANCE STATUS: A full-time student is one whose academic load in terms of course work or other activity *(such as a thesis, research, or teaching)* is at least 75% of that normally required of such students. Time spent by teaching fellows should be included only if such teaching is performed as a requirement for a degree. Employment which is not a part of the prescribed activity for an advanced degree should not be counted as time spent on graduate work. A part-time student is one who is carrying an academic schedule of less than three-fourths the normal load.

H. PLEASE EXPLAIN exceptionally large increases or decreases in specific fields of study, the absence of enrollment in previously reported curriculums, etc.

PART B--STUDENTS ENROLLED FOR PROFESSIONAL DEGREES IN SELECTED FIELDS

I. CLASSIFICATION OF ENROLLMENT BY LEVEL OF STUDY:

1. Report in columns 5-6 those students who have completed the previous college work *(pre-professional training)* required for admission to the professional school but who, prior to this term, had completed less than two semesters or three quarters of full-time study or the equivalent in part-time study in the professional school. Note that these students are identified by the amount of study completed prior to this term, rather than the number of semesters or quarters in which they have been enrolled. Work required because of lack of preprofessional background is not to be included in computing amount of study completed.

2. Report students who have completed one or more years of required study but who are not expected to complete all requirements for the professional degree by June 30, 1969, in columns 7-8 of Part B. Report in these columns students who, prior to this term, had completed two semesters or three quarters or more of full-time study or the equivalent in part-time study for the professional degree but who are not expected to complete all requirements by June 30, 1969.

3. Report students who are expected to complete all requirements for the professional degree by June 30, 1969, in columns 9-10 of Part B.

J. CLASSIFICATION OF ENROLLMENT BY ATTENDANCE STATUS:

See paragraph G above.

REPORT THE FOLLOWING EDUCATION-RELATED FIELDS OF STUDY AS SPECIFIED BELOW.

RELIGIOUS EDUCATION *(Report in Item 7414)* SCHOOL LIBRARIAN *(Report in Item 5300)*

Majors for students prepared to teach: The general rule is to classify students prepared to teach according to their major area of specialization. This means, in general, that students who are preparing to teach an academic subject such as English, Biology, Mathematics, Foreign Languages, etc., should be reported in English *(Item 2901)*, Biology *(Item 1704)*, Mathematics *(Item 5601)*, Foreign Language *(Item 3500)*, etc., and not in Secondary Education *(Item 2359)*.

APPENDIX B

Comparisons With Preliminary Estimates of Fall 1968 Enrollment

To obtain early estimates of shifts between fall 1967 and fall 1968 enrollments, a special effort was made to collect and analyze fall 1968 data for a sample of fields at a sample of institutions early in the academic year.3/ The nine fields for which the advance estimates were developed are listed in the first column of table B-1, reproduced from the preliminary report.

A sample of 285 institutions was used as a basis for the 1968 estimates shown in table B-1. This sample accounted for about 90 percent of candidates in the nine selected fields, although it included considerably less than half of the 819 institutions in the total fall 1968 survey.

Table B-2 compares the advance estimates of 1968 enrollment with final counts for the nine selected fields. Agreement between the two sets of figures is very good indeed -- not a very surprising finding in view of the fact that the advance estimates were based on institutions enrolling about 90 percent of the candidates in these fields. Nonetheless, variations might have been expected not only because of sampling fluctuations but also because of the preliminary nature of the information provided by some of the institutions in the sample; in a number of instances, the counts were revised before the final analyses were undertaken.

A related question concerns the relative magnitude of year-to-year shifts estimated from the sample fields as compared with those based on actual counts for all fields. Table B-3 shows these comparisons, which may be summarized as follows:

	Percent change, 1967 to 1968			
	Master's or doctor's		First-professional	
	Advance estimates	Actual	Advance estimates	Actual
Full-time enrollment:				
Men and women - all levels of study	+ 2.7	+ 7.2	- 3.3	- 0.5
Men only - all levels of study	+ 0.5	+ 2.6	- 4.4	- 1.1
Men only - first year only	- 3.4	- 2.5	- 9.4	- 5.9

The advance estimates suggested that gains would be smaller (or declines would be greater) than actually occurred, Obviously, this finding is attributable to the fact that enrollment in the sample fields increased less (or decreased more) than did enrollment in all survey fields; stated otherwise, the sample fields were not entirely representative of all survey fields with respect to year-to-year enrollment changes.

3/ Students Enrolled for Advanced Degrees in Selected Fields of Study, Fall 1968: Advance Estimates. Preliminary Report, March 3, 1969. National Center for Educational Statistics.

Both preliminary estimates and final counts point to the same conclusion: full-time advanced degree enrollments did not rise by the projected amount between fall 1967 and fall 1968. As the preliminary report points out, Office of Education projections had indicated that full-time advanced degree enrollment should have risen by about 10 percent if all other conditions had remained similar to 1967. As it turned out, the rise was not of the projected magnitude.

Table B-1.--Trend in full-time enrollment for advanced degrees in selected fields: Total 1965-68; total men and first-year men, 1966-68

Area or Field	Total				All Men			First-Year Men		
	1965	1966[a/]	1967[b/]	1968[c/]	1966[a/]	1967[b/]	1968[c/]	1966[a/]	1967[b/]	1968[c/]

a/ Estimates for 1966, rounded to hundreds, made up of data as reported to NCES, increased by 5%; institutions which did not report for 1966 accounted in 1965 for 5% of total enrollment for advanced degrees in round numbers. Reporting of law schools and medical schools was incomplete for years before 1968.

b/ Reporting of law schools and medical schools was incomplete for years before 1968.

c/ Preliminary estimates for 1968, rounded to hundreds; data for Law and Medicine, and Nine Fields are shown on a basis consistent with earlier years, i.e., excluding law schools and medical schools which existed in 1967 but did not report for that year.

d/ Does not include Law and Medicine.

e/ Detail may not add to totals due to rounding.

Table B-2. -- Comparison of advance estimates of full-time enrollment for advanced degrees with actual totals, for selected fields: Fall 1968

Area or Field	Total		All men		First-year men	
	Advance estimate	Actual	Advance estimate	Actual	Advance estimate	Actual
Business & Commerce	24,600	24,313	23,700	23,338	17,000	16,950
Engineering	29,200	29,736	28,800	29,389	13,200	13,604
Mathematics	10,400	10,316	8,300	8,247	3,700	3,573
Chemistry	12,800	12,817	11,100	11,121	3,700	3,677
Physics	10,600	10,256	10,100	9,792	3,100	2,965
Psychology	13,800	13,896	9,500	9,664	3,800	4,065
History	11,200	11,215	8,300	8,369	4,000	3,908
Law [a]	45,600	45,788	42,900	43,051	17,000	16,870
Medicine [b]	31,800	31,866	28,900	29,038	7,900	7,851
Total Nine Fields	190,100	190,203	171,600	172,009	73,300	73,463

---

[a] Excludes law schools which existed in 1967 but did not report for that year; includes candidates for first-professional degrees and for degrees beyond the first-professional.

[b] Excludes medical schools which existed in 1967 but did not report for that year.

Table B-3.--Comparison of year-to-year shifts in full-time enrollment for advanced degrees, based on advance estimates and on actual totals: Fall 1967 and fall 1968

Area or Field	Master's or doctor's						First professional					
	Advance estimates[a]			Actual counts[b]			Advance estimates[c]			Actual counts [d]		
	1967	1968	% change	1967	1968	% change	1967	1968	% change	1967	1968	% change
Full-time enrollment:												
Men and women - All levels of study	109,690	112,600	+2.7	301,140	322,936	+7.2	80,006	77,400	-3.3	108,848	108,284	-0.5
Men only - All levels of study	99,316	99,800	+0.5	226,583	232,573	+2.6	75,094	71,800	-4.4	103,031	101,943	-1.1
Men only - First-year only	50,187	48,500	-3.4	116,920	113,976	-2.5	27,475	24,900	-9.4	35,584	33,499	-5.9

---

[a] Based on the seven master's or doctor's fields shown on table B-1.
[b] Based on all master's or doctor's fields shown on tables 9 and 10.
[c] Based on the two first-professional fields shown on table B-1.
[d] Based on all first-professional fields shown on tables 11 and 12.
